

stosag

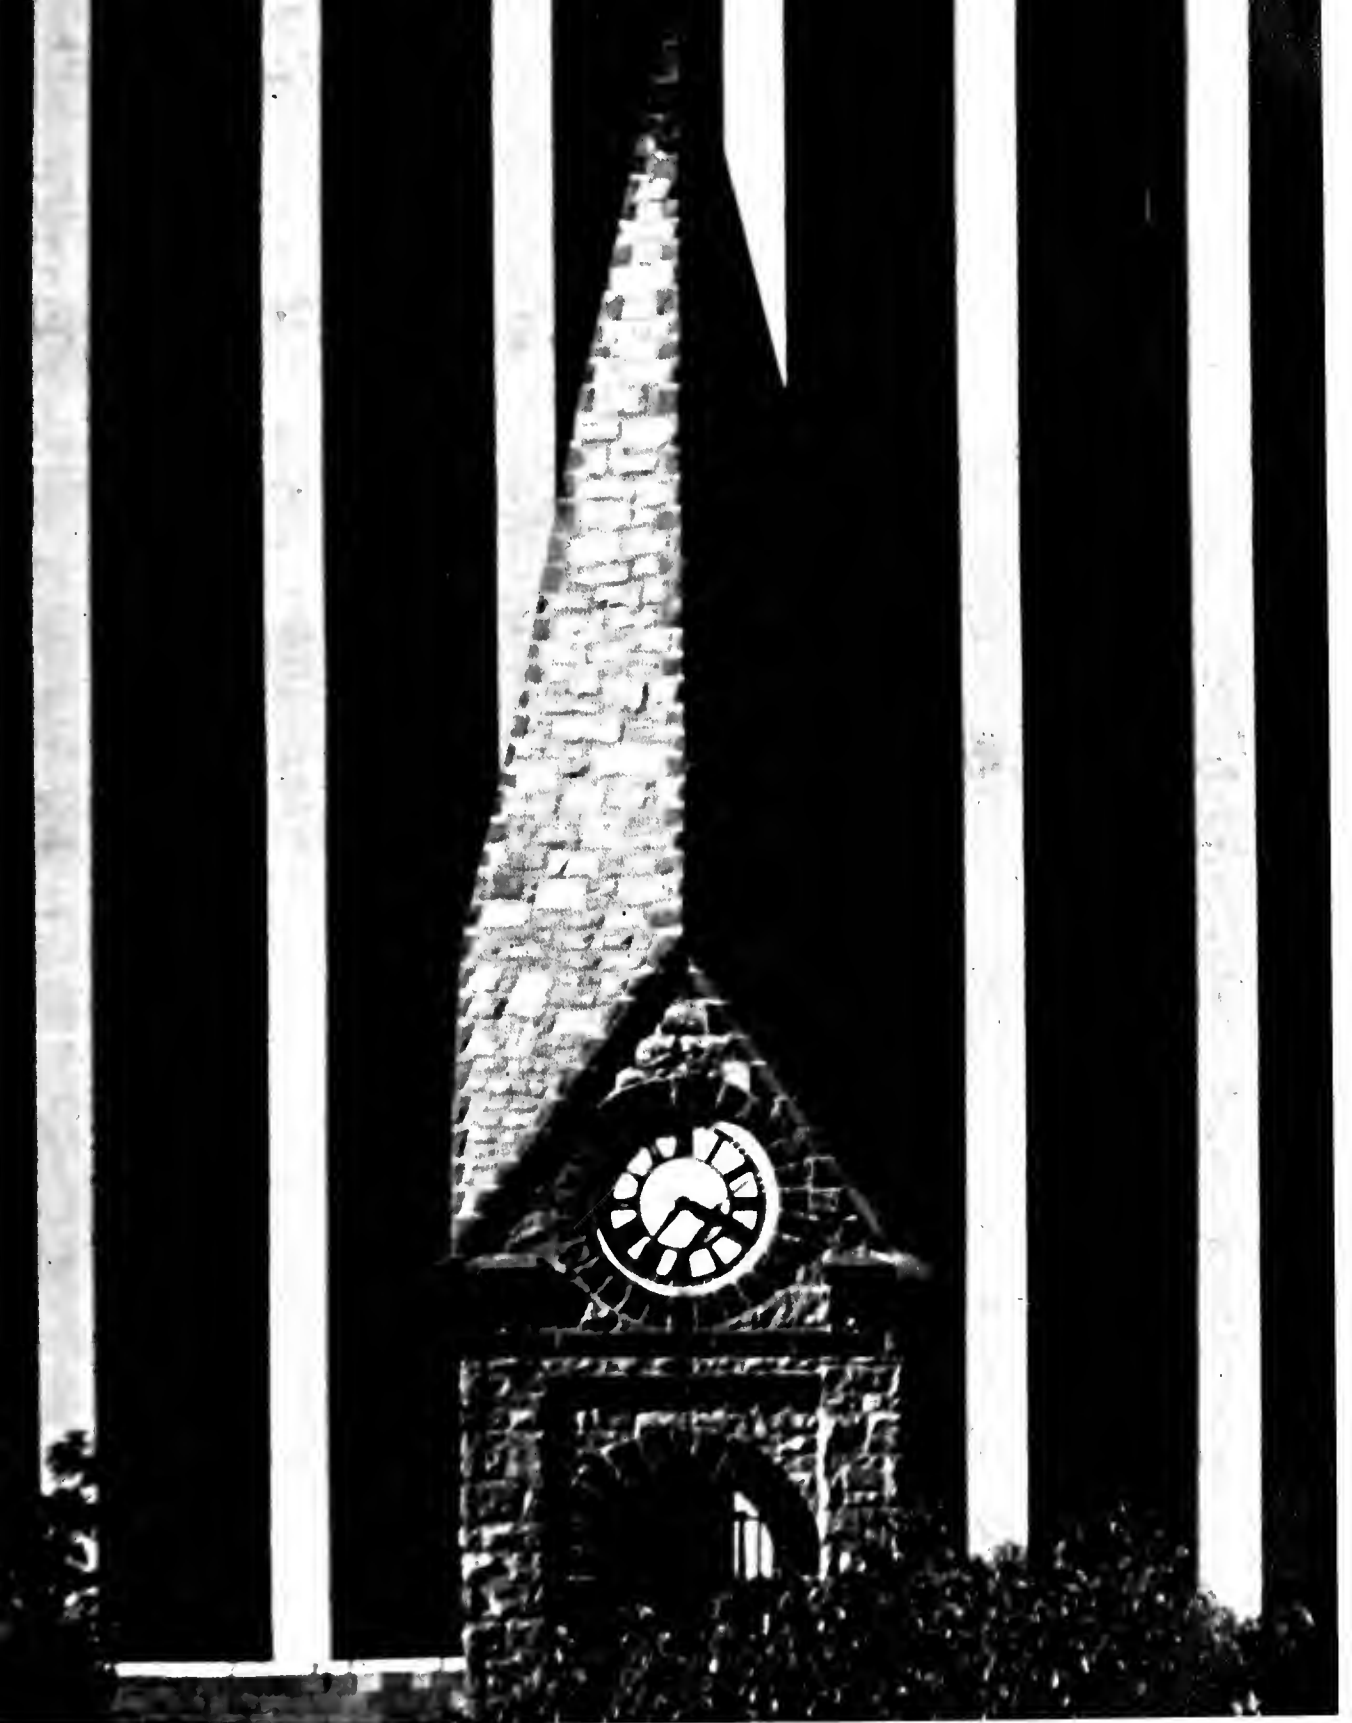

stosag '74

when we first discovered our position as editors, and only members of stosag '74 we said "great". it would allow us to be creative by revising the traditional stosag to a contemporary pictorial review. we would show those prime moments and occasions that depict what we all shared at stockbridge and umass. we would not build a partition segregating the two year from the four year. we would increase the color sections and spread it throughout the book. we refused to be frugal and yet never to be wasteful.

there were new doors to open and we would man a large staff to open them all. we would not leave a rock unturned. we would ask for student opinion and be prepared to thrust forth into the business of making this the biggest, best and most complete in quality and text in stosag's history . . .

the people . . .

with his constant help, wit and unending attention, it is with utmost pleasure and gratitude that by unanimous vote that stosag '74 dedicate this volume to our director, dean, dr. john william denison.

dr. denison was born in harrison, maine on april 20, 1927. upon graduation from bridgton academy he enlisted in the navy as a radar technician. following his discharge, he attended the university of maine, where he got a b.s. in poultry science.

he then returned to the family farm in maine and after a disastrous fire that ruined the farm, he then held jobs as sailor, farm operator, wrestling coach, professional wrestler, deputy sheriff and boy scout leader.

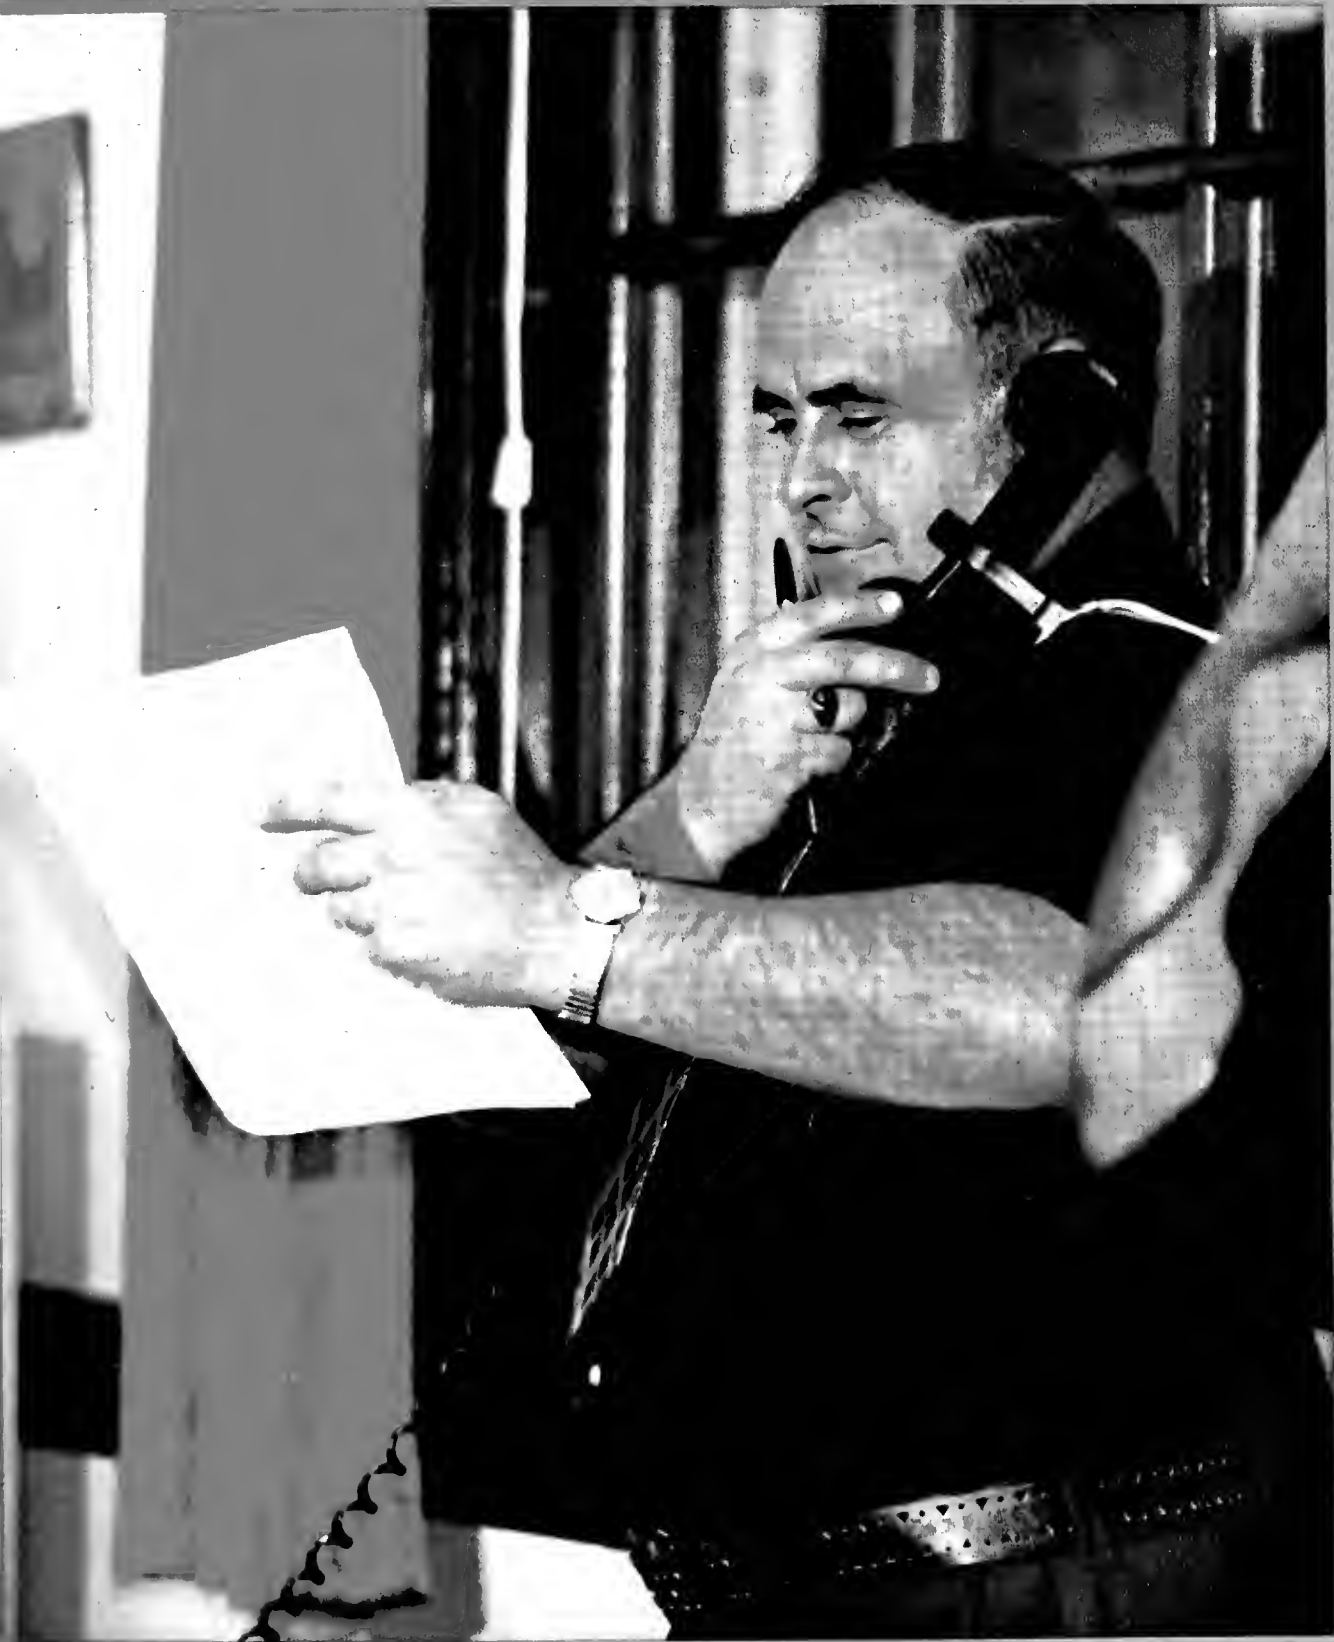

from 1952 to 1962 he was employed as a sales and service manager for wirth more feeds and after earning a reputation of the highest calibre, was appointed first regional poultry specialist in 1961 through the university of massachusetts. he then began his graduate study which led to a m.s. in agricultural and food economics in 1965.

just recently, in 1970, he has completed the requirements for an ed. d. degree in educational administration. the title of the dissertation was, "a study of the predictive relationships between admission criteria and academic achievement for the stockbridge school of agriculture."

dr. denison has been very active in academic organizations such as: animal science club advisor, university calendar coordination board, placement and financial aid in the veterinary and animal science departments, former advisor to stoso, a member of the stockbridge advisory committee, among others. his professional and honorary societies include alpha zeta, poultry science, and phi kappa phi.

he has been an author and co-author of several publications including bulletins on egg production, cage and floor plant sizes, post-high school education in poultry science, and several others.

he has earned much more than this small award in script, but foremost in heart.

for the class of 1974

you are my class. we arrived together, you and i. you came as freshmen and i as a freshman associate director. we have grown together and learned together. i have learned much in my two year stay at the stockbridge school. i hope that you have. i know stockbridge has made a better person of you. i hope it has of me.

you have now completed your work here. i have not. my job will continue. there will be other classes coming, growing, learning and leaving. i will love them too, learn from them and miss them when they are gone. but it will not be the same for me ever again. only with the class of 1974 have i shared the thrill and excitement of a new beginning.

i dislike that old graduation cliché — you are the hope of the future. of course you are! my question is, what kind of hope will you be? will my future be in good hands? i believe that it will, because you will continue to grow and learn; to use good judgement in the discharge of your coming responsibilities; to pursue right, not wrong, proudly and fiercely; to show tolerance and compassion for the weakness of others; and to persevere in the face of strong opposition. these things i trust you to do.

with all my heart, i wish you the wisdom to live your lives with honor and integrity. if you do this, you will like yourselves, and if you like yourselves you will be happy and successful.

my thoughts will be with you always. god bless you!

although we did succeed in many aspects of our original proposal, now in ending we found it was impossible to keep promise to all that we had anticipated. it seems also impossible to truly express to you our feelings concerning any of the developments or achievements in fulfilling our positions as editors of stasag 74.

we now hope that rather than using this journal to look back, we hope you will use it to look ahead.

Paul J. Rogers
James Fuses

co-editors
